June 2, 2011

Dear Brothers and Sisters,

The 2011 United Way campaign will officially kick off on August 31, 2011. The United Way provides funding for many programs that help families, children, the elderly, people with special needs, youth and the jobless. I'd be willing to bet that we all know someone who has benefitted in some way from a United Way agency. It's time for us to help these agencies to continue the good work they do in our communities.

As many as one third of working Americans do not earn enough money to meet their basic needs. We all deserve the chance to build a good life. Many families are having trouble making ends meet because of sudden changes in their incomes or health. Your generosity will help those families to access basic human needs like food, shelter, physical and mental health care and dental care.

One person can make a difference. When the labor community comes together in support of United Way, we can change the lives of hundreds of thousands of people in our communities. Please give to United Way this year. Know that you can be a part of the solution for helping support the agencies that support our communities.

In Solidarity,

Patricia Elizondo

President IAMAW Local Lodge 66
